

**CRITERIA FOR PROHIBITED INVASIVE INSECTS IN  
NEW HAMPSHIRE**

Last Revised on January 5, 2005

Scientific Name: \_\_\_\_\_ Common Name: \_\_\_\_\_  
Synonyms: \_\_\_\_\_ Taxonomic Position: \_\_\_\_\_  
Native to: \_\_\_\_\_ Date introduced: \_\_\_\_\_  
Host: \_\_\_\_\_

To be listed as a prohibited invasive insect in New Hampshire the insect must meet the following criteria. The criteria evaluates factors that aid in determining an insect's potential to become established, and cause economic or environmental damage in New Hampshire.

	YES	NO
1. Is the insect non-native to New Hampshire?	<input type="checkbox"/>	<input type="checkbox"/>
2. Does the insect have the biological potential for widespread dispersion and rapid establishment in New Hampshire?	<input type="checkbox"/>	<input type="checkbox"/>
3. Is host material available?	<input type="checkbox"/>	<input type="checkbox"/>
4. Does the insect occur in similar climates to New Hampshire?	<input type="checkbox"/>	<input type="checkbox"/>
5. Does the insect negatively affect native species, natural communities, commercial agriculture, forest crop production, or human health?	<input type="checkbox"/>	<input type="checkbox"/>

If the answer is **YES** to all of the questions above, then the insect meets the criteria as an invasive insect species.
